Map Data

Inset

Out Area

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

¹ A " " following a place name indicates that the place is coterminous with a MCD. A " " indicates that the place is also a false MCD; the false MCD name is not shown.

² This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries and numbers within the subject entity that without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservations or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

³ A " " following a block number indicates that the block number is repeated elsewhere in the block.

Modality	Inset	Out Area

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

1. Following a place name, a "C" indicates the place is a county with a MCD. A "*" indicates that the place is also a false MCD; the false MCD name is not shown.
2. If a place has a single tribal census tract boundaries and numbers within the subject entity, nontribal census tract boundaries are shown outside of the subject entity, but without numbers. If a place has multiple tribal census tracts, the tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian reservation is shown within the subject entity, while other off-reservation trust land crosses state or county boundaries, the same American Indian tribal census tract number is shown outside of the boundary, and, if so, constitutes a single tribal census tract entity.
3. Following a block number, a "B" indicates that the block number is repeated elsewhere in the block.
